WORKING PAPER

Technical Staff

Significant Substantive Items, Week of 22-26 October 1979

25X1

1. [redacted] and I accompanied an OD&E contract officer to Bausch and Lomb in Rochester, N.Y. on 25 October to review the progress B&L has made on our ten Zoom 500 tables and scopes due for delivery next spring. It was the first opportunity we had to meet with their mechanical, electrical, and optical engineers and discuss the specifications. [redacted]

well?

ILLEGIB

2. Although [redacted] procedures for batch processing and cloud editing have created delays in film receipt and general confusion, considerable savings have resulted. Batching is responsible for a 12% reduction in film chemistry and 13 fewer people needed in the production area. Cloud editing has been possible on about 13% of the frames. [redacted]

25X1

3. [redacted] will be visiting Richards Corp. this week to conduct final acceptance testing of the first eleven of thirty-three 2x9 split format light tables intended as replacements for the MIM-4's now in use. We expected delivery within 7-10 days. [redacted]

25X1

4. [redacted] asked that we send him only the number of copies of reports based on the following criteria:

25X1

6 copies of reports [redacted] at the unclassified, confidential or secret level;

25X1

4 copies of releasable reports at the TS codeword level;

1 copy of NOFORN reports. [redacted]

25X1

5. On the Freedom of Information and Privacy Acts front:

a. As a result of the Acts, federal agencies in 1978 eliminated 363,000,000 personal files.
